

Department of District Attorney

Department Purpose

The Oregon Constitution, Article VII, Section 17 creates the elected office of the prosecuting attorney, “who shall be the law officers of the state, and of the counties within their respective districts, and shall perform such duties pertaining to the administration of law, and general police as the legislative assembly may direct.” In summary, the Legislative Assembly has directed the following:

- Prosecution, under Oregon Revised Statutes, of all violations of state criminal statutes;
- Civil and criminal enforcement of child support obligations;
- Assist the juvenile court in delinquency and dependency matters;
- Provide assistance to crime victims as required by the Oregon Constitution and the statutes; and
- Miscellaneous other responsibilities such as ruling on public records requests.

District Attorney

Department Overview

The Kids' FIRST Center (formerly known as the Child Advocacy Center) provides services to child victims of crime and to law enforcement. The Criminal Prosecution Division prosecutes adults and juveniles for criminal conduct. The Family Law Division enforces child support obligations. The Medical Examiner's Office investigates and determines the cause and manner of all suspicious deaths. The Victim Services Program provides support to adult victims of crime.

Department Goals & Objectives

The department's strategic goals continue to be to meet the constitutional and statutory requirements for the office of District Attorney. Under the law the department must:

- Conduct training for all participating agencies handling child abuse cases to assure uniform handling and investigation through the county in a manner sensitive to the needs of children.
- Prosecute criminals.
- Enforce child support obligations.
- Investigate and certify all deaths as required by ORS 146.
- Provide services to crime victims to make sure their constitutional and statutory rights are upheld.

These goals are met through the following objective: To hire and retain a model professional staff. It is hard to meet these objectives as compensation is not competitive, the workload is heavy, and there are too few lawyers, investigators, and support staff.

An independent study has the department about eight attorneys and six investigators short of what is needed. Market adjustments in the attorneys' 2005-2007 contract helped on the compensation issue.

District Attorney

Key Accomplishments in FY 08-09

- Successfully facilitated investigations and follow-up of over 700 child abuse allegations.
- Successfully prosecuted almost 6,100 criminal cases.
- Successfully raised almost \$19 million in child support.
- Successfully determined the cause and manner of death in about 300 suspicious death cases.
- Documented over \$2.8 million in restitution in FY 08-09.

Changes, Challenges & Opportunities for FY 09-10

- A variety of funding sources are needed to continue the work of the Kids' FIRST Center to lessen the trauma experienced by abused children. No general fund dollars are budgeted for this division.
- Twenty years ago the office "held the plea bargain line" and tried many more cases. With a dysfunctional jail and crushing caseloads, our lawyers are forced to plea bargain over 97 percent of the criminal cases. The sentences are often lenient and less effective due to the inadequate jail capacity and over-stretched alternative programs. Prosecuting repeat offenders is a way of life for lawyers and staff.
- The Lane County Circuit Court Judges and the Public Defender's Office are willing to develop streamlined court procedures consistent with the constitutional and statutory rights of defendants. There has been success in this area in the past and we will continue to look for better ways to do the work, but lack of investigators and jail space causes slippage and inefficiency.
- Successfully prosecute approximately 3,500 felony and 2,800 misdemeanor criminal cases.
- Successfully collect almost \$19,000,000 in child support.
- Assist the new State Deputy Medical Examiner, Dr. Dan Davis, in determining the cause and manner of death in 300-400 suspicious death cases.
- Secure an affordable permanent morgue facility and additional professional death investigators.
- Successfully help thousands of crime victims navigate their way through the criminal justice system.
- House Joint Resolutions 49 and 50 were passed by the Oregon voters May 20, 2008 and provides for the enforcement of victims' rights. These measures require the District Attorney's office to file thousands of certifications of rights compliance with the court.

Performance Management

- Forensic interviews at the Kids' FIRST Center have remained consistent in numbers over the years, although the amount of work has increased. With the implementation of Karly's Law in July 2007, the Center has experienced a large increase in the number of children served (12 to 16 more per month). These children all receive a medical assessment and/or case review by the Center's doctor and the Multi-Disciplinary Team.
- Caseload per lawyer slightly increased from 2006 to 2007 and the workload continues to increase with increasing crime. These caseloads are too high for adequate case preparation by the attorneys and force us to plea bargain.
- The Family Law Division does an outstanding job each year collecting support for children. However, collection of child support may decrease during the current recession and as the Family Law Division complies with increasing non-collection service mandates resulting from both federal and state legislation.
- Cases that come to the Medical Examiner's Division receive a coordinated death investigation.
- The database used by the Victim Services Program allows staff and volunteers to accurately document all services provided to victims. These services include such things as assisting victims in obtaining restraining orders, notifying them of critical court hearings, accompanying them to court, and determining the amount of restitution. The 31,281 services provided in FY 08-09 is a testament to the hard work and dedication of the volunteers and staff in the program.

District Attorney: Kids' FIRST Center

Division Overview

The Kids' FIRST (Forensic Intervention Response and Support Team) Center, formerly known as the Child Advocacy Center, exists to lessen the trauma experienced by children who have been victims of abuse or witnesses to domestic violence and are involved in the criminal justice process. Child forensic interviews, medical assessments, parent educational support groups and grand jury hearings involving child victims and witnesses are conducted at the Center. In addition, the Lane County Multi-Disciplinary Child Abuse Intervention Team meets regularly at the Center to review cases and address problems in physical and sexual abuse and domestic violence witness investigations (ORS 418.747). In January 1994, a building was purchased and subsequently remodeled with a Community Development Block Grant. In October 2007, the agency moved to a new location due to new development in the area and a need for additional space to accommodate expanding services. House Bill 5061 provided for the Child Abuse Multi-Intervention Account (CAMI) that has been awarded to the Friends of the Child Advocacy Center, Inc. With CAMI, Victims of Crime Act (VOCA), and Rural Domestic Violence grant funds decreasing in recent years, significantly less money has been available to run Kids' FIRST.

Division Objectives for FY 09-10

- Conduct training for all participating agencies handling child abuse cases to ensure uniform and optimized handling and investigation of cases throughout the county in a manner sensitive to the needs of children.
- Expand services to children living in drug homes through the continued development of Drug Endangered Children Protocol and ongoing training for Law Enforcement and Child Protective Services personnel.
- Continue training MDT members in regard to Karly's Law protocol and review process. Karly's Law, in effect since July 2007, modified procedures in child abuse investigations.
- Continue training and supporting medical experts as designated medical providers.
- Improve collaboration with local health care provider, PeaceHealth.
- Improve outreach services to child abuse victims in rural Lane County.

Key Accomplishments in FY 08-09

- Successful investigation and follow-up of nearly 700 child abuse allegations.
- Secured a \$375,000 Federal Office of Victims of Crime / Rural Domestic Violence Child Victimization Grant that funds the Domestic Violence Witness Project. This represents a cut from the \$500,000 awarded in the previous two grant cycles.
- Refined Karly's Law protocol and review process.
- Developed and trained 4 medical experts as designated medical providers to be available for Karly cases.
- Recovered the Volunteer Coordinator position at the Center.
- Received award as regional service provider.
- Completed training of all County LEA and DHS personnel on responding to domestic violence cases including child witness protocol.

Changes, Challenges & Opportunities for FY 09-10

- Our challenge is to keep the Kids' FIRST doors open through a variety of funding sources. No general fund dollars are budgeted for this Division, but grants and sporadic general fund supplements keep the program viable. Success with children presents the opportunity to gain more grant support.

District Attorney: Kids' FIRST Center

Performance Management

A variety of performance measures are used at Kids' FIRST. Our basic objective is to reduce the trauma to child victims and child witnesses who come through Kids' FIRST. We also track the number of grand jury hearings, physical examinations and volunteer advocate hours. Many of these measures are activity indicators. Our greatest success is reflected in the positive feelings that children and parents have when a child is well cared for at the Center. Although our "customer" surveys render an overwhelmingly positive response, there is a low return rate we are striving to improve.

The Kids' FIRST Center also improved the quality and efficiency of the prosecutions by the Lane County District Attorney's Office. Recorded interviews of child victims describing sexual, physical, and domestic abuse and recounting their observations of domestic violence significantly enhance offender accountability. Statistics demonstrate that when child victim interviews are recorded at the Center, the rate of criminal prosecution and conviction increases significantly and most cases result in negotiated pleas rather than jury trials.

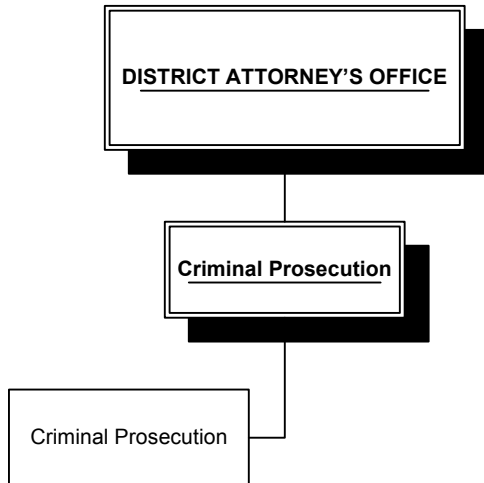

- Numbers of forensic interviews have remained steady. The Center has interviewed an additional 12 to 16 children per month as a result of Karly's Law. These children all receive a medical assessment and case review by the Center's doctor and the Multidisciplinary Team.
- The number of on-site medical exams fluctuates, making it difficult to predict future needs. Any time a child discloses possible sexual penetration, a medical exam is indicated. The implementation of Karly's Law also requires more children to receive forensic exams for physical abuse. As a result, this year we exceeded our target numbers.
- The number of volunteer victim advocate case managers has also fluctuated over the past few years. The volunteer coordinator position was filled in early FY 08-09, briefly vacated, and filled again in June 2009. Rotary Duck Race and Oregon Community Foundation grants now fund the position. This past year, a total of 24 volunteer victim advocate case managers provided services.
- A number of factors make it difficult to predict a ratio between child interviews and grand jury proceedings. Recently the prosecutor's office has offered defendants the option of waiving their right to grand jury review. Many felony charges are now processed through a District Attorney's Information without a Grand Jury hearing. As a result, child victims are saved from the potential additional trauma of testifying before the Grand Jury. This practice has decreased the number of Grand Jury hearings conducted at the Center and explains our overestimate of FY 08-09.

District Attorney: Criminal Prosecution

Division Overview

The purpose of Criminal Prosecution is to successfully prosecute criminal cases in Lane County Circuit Court for the people of Lane County in order to maximize public safety.

Division Objectives for FY 09-10

- To successfully prosecute approximately 5,000 felony and misdemeanor cases.
- To continue to successfully prosecute approximately 2,000 probation violation filings.
- To continue to successfully prosecute approximately 440 violation of restraining order cases.

Key Accomplishments in FY 08-09

- Successfully prosecuted approximately 5,000 felony and misdemeanor cases.
- Successfully prosecuted approximately 2,000 probation violation filings.
- Successfully prosecuted approximately 440 violation of restraining order cases.

Changes, Challenges & Opportunities for FY 09-10

In 1980-81, when there were approximately 60,000 fewer residents in Lane County, the District Attorney Criminal Division was staffed with 29 to 32 lawyers and 11 investigator/detectives. Over the intervening 27 years, DA staffing levels underwent severe cuts followed by intermittent improvements and reductions. This year we were fortunate to recover two of the lost attorney positions, one of the nine lost investigator positions, and two other staff positions. Collectively these additions bring our investigation and prosecution units up to approximately two-thirds of the 1980 staffing. That may sound grim, and it still leaves the office well below the level recommended following the 2004 comprehensive staffing analysis done by APRI (American Prosecutors Research Institute), but we're in *much* better shape to manage the increasing crime problem and protect our community.

The staffing improvement will allow us to keep up with the steady flow of felony property cases while managing the sharp increase in armed robbery, rape and other violence. This is critical, as the felony property cases represent a large percentage of the harm done to our community. Also, the inability to thoroughly prosecute felony property cases adversely affects the level of financial support the state provides to the county under the Community Corrections Act, so recovering the positions necessary to manage the caseload will help to protect the state financial support for the county public safety system.

It will also allow our office to properly support our new Domestic Violence team, a group that has substantially improved both the way we manage domestic violence cases and the quality of the training we provide for other law enforcement agencies. Collectively, these improvements will do a great deal to enhance community safety.

District Attorney: Criminal Prosecution

In the Felony and Misdemeanor Cases Filed chart above, note the number of misdemeanor cases filed. The misdemeanor cases dropped dramatically in 2004 and 2005 because non-violent misdemeanor cases were no longer filed.

District Attorney: Criminal Prosecution

Performance Management

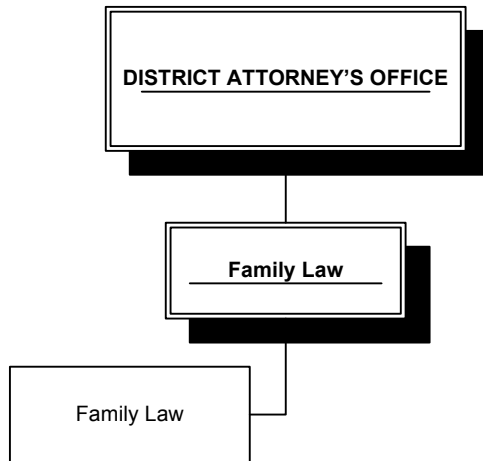

- In each of the performance measures listed below, target numbers were not listed, due to the fact that all cases brought to our office from all law enforcement agencies must be processed.
- Felony cases filed rose slightly between 2004 and 2005 even though 183 felony drug cases were reduced to non-criminal violations. They have dropped off as we screen out cases.
- The number of misdemeanor cases filed has sharply declined as a direct result of a no-file policy for non-violent misdemeanors instituted in April 2004 after years of budget cuts. The number has started to rise again as we have eliminated the “no file” policy.

DIVISION PERFORMANCE MEASURES					
Performance Measures	2005 Actual	2006 Actual	2007 Actual	2008 Actual	2009 Estimate
Felony cases filed	3,800	3299	3368	3027	3650
Misdemeanor cases filed	1,865	1696	2077	2893	2275
Caseload per lawyer	270	250	259	269	235

District Attorney: Family Law

Division Purpose Statement

Pursuant to ORS 25.080, Family Law obtains financial and medical support for children from both parents through establishment of paternity and child support and health care coverage orders, and enforcement and modification of existing child support and medical support orders.

District Attorney: Family Law

Division Overview

The purpose of the Family Law Division is to obtain financial and medical support for children from both parents through establishment of paternity, child support and health care coverage orders, and enforcement and modifications of existing support orders. Family Law must perform these services in compliance with the requirements of Title IV-D of the Social Security Act (42 U.S.C. Section 651 *et seq*) and Title 45 of the Code of Federal Regulations, Parts 300 to 399) and the applicable Oregon Revised Statutes and Oregon Administrative Rules.

Division Objectives for FY 09-10

To continue to collect at least \$19 million for children.

To continue to meet or exceed performance requirements necessary to maximize federal funding.

Key Accomplishments of FY 08-09

- Collected almost \$19 million last year for families with children in Lane County.
- Successfully collected support on 54% of specially targeted hard-to-collect cases referred to the Family Law Division for enhanced enforcement. More than \$.75 million in support is flowing to these families, in most cases for the first time ever or after several years of no support.
- Successfully implemented new service mandates imposed by the Deficit Reduction Act of 2005 and changes in the Oregon child support guidelines.

Changes, Challenges & Opportunities for FY 09-10

Newly enacted federal and state legislation requires substantial resources for implementation. Administration of newly mandated processes, while adding to current and future workloads, does not contribute to increased collections, nor improve earned performance incentives, yet must nevertheless be addressed. Reductions in local county public safety funding further reduces the means to hold non-custodial parents accountable for failing to support their children.

- In addition to establishment of medical support orders, Family Law is now required to enforce such orders against either or both parents, with no additional funding.
- Family Law must accommodate an increased demand for modifications due to newly-enacted recession response legislation requiring expedited employment-related temporary modifications.
- Family Law seeks to maintain current collection levels in the face of substantial local increases in unemployment and diminishing county and state law enforcement resources necessary for imposition of support enforcement sanctions.

Performance Management

One measure of Family Law Division performance is the total amount of support collected.

The Division also measures establishment of paternity and/or child support orders on cases referred to the Division without such orders, calculated as the percentage of cases without orders compared to the number of cases in the caseload.

Performance is also measured on the amount of past support collected on cases with support arrears owing, calculated as the number of cases with arrears compared to the number of cases paying on arrears.

Cost-effectiveness of services provided is measured by the amount of support collected for each \$1 of Family Law Division expenditures.

District Attorney: Family Law

The Family Law Division is on target to receive 100 percent of the available federal performance incentives as follows: The Family Law Division will exceed the federal performance benchmark of 80 percent or better for support order establishment and collection of support arrears and continue to be eligible for 100 percent of the available incentive payments in those areas. The Family Law Division will collect more than the minimum \$5 of support for each \$1 spent and thus earn 100 percent of the cost-effectiveness incentive.

There is no basis for projecting increased caseload numbers or collections at this time. The number of cases assigned to the Family Law Division has remained fairly stable for the past several years. Future collections may continue to decrease as a direct result of local joblessness, the elimination of public safety resources available for enforcement sanctions, and the increasing unfunded service mandates resulting from federal and state legislation.

DIVISION PERFORMANCE MEASURES						
Performance Measures	2006 Actual	2007 Actual	2008 Actual	2008 Target	Comment	2009 Target
Total collections	\$20.3 million	\$19.8 million	\$19.0 million	\$20.0 million	below target	\$19.0 million
Establishment of orders	96.4%	96.6%	96.5%	96%	***	96.5%
Collection of arrearages	n/a	81%	83%	81%	***	83%
Cost effectiveness (support collected per \$1 spent)	n/a	\$12.15	\$11.32	\$12.15	***	more than \$5.00

*** Current performance exceeds the federal benchmarks and therefore earns 100% of available performance incentive payments.

District Attorney: Medical Examiner

Division Overview

By statute, the Medical Examiner provides for investigations of all non-natural and unattended natural deaths in Lane County. This program was transferred to the District Attorney by Board Order in April 2002, as the Medical Examiner and the District Attorney share jurisdiction for death investigations.

The Medical Examiner's Office is operated under the joint supervision of the Oregon State Medical Examiner's Office (OSME) and the District Attorney's Office. The OSME employs a forensic pathologist to perform post-mortem examinations and to certify the cause and manner of deaths of each medical examiner case. The investigators of the Lane County Medical Examiner's Office (LCME) provide scene investigations, follow-up and other services.

The objective of the Medical Examiner's Office is to: 1) recover human remains; 2) identify them individually; 3) preserve and recover evidence and property associated with each case; 4) determine cause and manner of death; and 5) return remains to next of kin. Primary activities include attending the scene of death and follow-up investigation, performing post-mortem examinations, coordinating investigations with law enforcement agencies and other experts, communicating with families, and writing reports of investigations. The Medical Examiner's Office is successful in documenting a cause and manner of death in every case. Our reports are used in criminal and civil adjudication, insurance, personal and public health records, child fatality review, and state epidemiology monitoring. Our Deputy Medical Examiners work closely with law enforcement, public health and other public agencies, as well as with individuals affected by each death to make the death investigation process efficient and accurate while remaining compassionate and respectful toward grieving survivors.

Division Objectives for FY 09-10

- Investigate and certify all deaths, as required by ORS Chapter 146.
- Continue to stabilize the office by improving the investigative process and morgue operations.

Key Accomplishments of FY 08-09

The LCME successfully determined the cause and manner of death of approximately 300 deaths in Lane County during calendar year 2008.

The LCME office improved office operations toward Oregon State Medical Examiner's Office standards under the supervision of forensic pathologist medical examiner, Daniel W. Davis, M.D., who is funded by the OSME.

Changes, Challenges & Opportunities for FY 09-10

The caseload has remained constant for the past several years. However, the logistical complexity of the workload has gone through a several year transition from 2004-2008, since the retirement of our venerable forensic pathologist Edward F. Wilson, MD. Sarah S. Hendrickson, M.D. served Lane County during this period as the County Medical Examiner by default, due to her position as Lane County Public Health Officer. The medical work of autopsies during this period was continued by the State of Oregon through a contract with pathologist James N. Olson, M.D. from Medford and also from the Oregon State Medical Examiner's Office in Clackamas, Oregon. The medical service of forensic pathologists has gone from the use of private physicians paid as consultants by contract with the State of Oregon toward the present model of hiring physicians as state employees to do the medical work mandated by ORS 146.

Presently the Oregon State Medical Examiner's Office has budgeted for a full-time position of a forensic pathologist to serve as Deputy State Medical Examiner for Lane County. That person is Daniel W. Davis,

District Attorney: Medical Examiner

M.D., who is a medical doctor and pathologist with sub-specialty training and board certification in forensic pathology. He has been operating as the Lane County Medical Examiner since February 2008. The State Medical Examiner, Karen Gunson, M.D., has envisioned Lane County as being the hub in one of four regions of a statewide regional medical examiner system with a new regional forensic morgue facility to be built in Springfield, though the funding for such a program is uncertain.

Since the arrival of Dr. Davis as Lane County Medical Examiner, the caseload under medical examiner jurisdiction has increased as a proportion of the total deaths in Lane County. The second half of calendar 2008 produced 167 jurisdictionally accepted cases of the 304 total. The first half of 2009 has produced 182 cases.

In addition to attending death scenes, the process of death investigation requires a large amount of generally unappreciated time and effort for follow-up activities. These activities include: obtaining and reviewing medical records; identifying, locating, and speaking with the next-of-kin or other persons familiar with the decedents; interacting with funeral directors; assisting the pathologist at autopsy; preparing and sending specimens for toxicological analysis; documenting the investigations in typically multiple incremental drafts; transferring documentation to the state office database; supervising the part-time investigative and morgue employees; and general administrative activities. The daytime shift requires the most intensive investigative effort as autopsies are being performed during the day and the most efficient follow-up is available during daytime hours when medical offices are open and treating physicians are obtainable. At the same time, new death scenes are being discovered and require an immediate response. Under the supervision of Dr. Davis, investigators are generally providing more effort than in previous years to obtain more reliable authoritative medical, circumstantial and law enforcement investigative information that is the standard held by the Oregon State Medical Examiner.

In other comparable jurisdictions in Oregon, a minimum of three full time medico legal death investigators cover jurisdictions the size and population of Lane County. Lane County plans in fiscal year 2009-2010 to operate with just two full-time investigators on staggered shifts, and some additional part-time investigative help, for the mandate of providing credible death investigations with a timely response 24 hours per day, seven days per week. It is apparent that that the current staffing configuration is inadequate to meet this expectation without additional resources.

The two full-time investigators presently employed by Lane County are both simultaneously nearing retirement age. The office will require more than part-time temporary employees to make a transition when Lane County loses one of these investigators to retirement and to keep up with the increasing demands of death investigation in this county. There is an opportunity to adequately train a replacement for one of these positions by hiring another full-time investigator sooner than later. There is also an opportunity to improve efficiency of the existing program by budgeting for more training for existing part-time employees.

Also, the morgue that has been used at Sacred Heart Hospital for 30+ years is in a state of transition as the hospital transferred its center of operation to RiverBend Hospital in Springfield. Peace Health Medical Center is also in the process of renovating its Hilyard campus. Major portions of the old hospital are scheduled to be demolished, which includes the site of the present morgue. Presently the hospital has worked a temporary leasing arrangement with Lane County to remain in the present morgue. There have been some cost savings in this arrangement to Lane County from the previous arrangement of case-by-case billing of the county by the hospital, but these savings have been offset by the lease and morgue operating costs as the county must now provide for morgue personnel, equipment, and disposable items.

District Attorney: Medical Examiner

Performance Management

- Oregon Revised Statutes require the certification of all deaths that are non-natural and unattended natural deaths in Lane County. This number fluctuates according to various demographic circumstances from year to year, but has been dramatically increasing in the past year, due to increased scrutiny of deaths reported to the office.
- Our investigators are called to investigate approximately 900 of the total 3,000 deaths per year in Lane County per the reporting requirements of ORS 146 and presently take jurisdiction in approximately 400 of those deaths. Each of these cases receives a report of investigation. Many, if not most of these cases get examined by an investigator or the pathologist. A large percentage of the cases are autopsied and require toxicology or other procedures. Medical examiner reports of investigation are sent to the Oregon State Medical Examiner's Office for the official record and dissemination. Reports of investigation and autopsies with supporting data are retained in hard files at the Lane County District Attorney's Office.
- The philosophy of death investigation in Lane County is that they each receive a coordinated investigation through the Lane County Medical Examiner's Office and many other agencies in Lane County. The present Lane County Medical Examiner, Daniel W. Davis, MD is a forensic pathologist and an Oregon State Medical Deputy Medical Examiner employed by the state. He has already made an impact in stabilizing the medical examiner system in Lane County and improving the investigative product. He is also a very innovative person. His ideas and energy are already also influencing the state to improve its practices, particularly toward Internet-based applications of reporting and documentation of cases. In that way there is an opportunity for Lane County to become a statewide standard for quality and improvement in the future.

District Attorney: Victim Services Program

Division Overview

The purpose of the Victim Services Program is to provide comprehensive services to crime victims in order to guarantee that victims' constitutional and statutory rights are upheld. Services include: victim notification, restitution analysis and calculation, assisting victims with the emotional and psychological problems associated with being victims; referring victims to other community agencies; counseling referral as appropriate; and assisting victims with filing claims with the State of Oregon Crime Victims' Compensation program.

Key Accomplishments of FY 08-09

- In the past year the program has provided 31,281 services to victims regarding their rights and notifying them of critical court hearings so they could decide whether or not they should attend.
- Victim accompaniment to trials and sentencing hearings to explain the process and provide emotional support.
- Protective Order Clinic, staffed by volunteers and one paid staff member, continues to provide assistance to approximately 200 petitioners per month.
- Over \$2.8 million in restitution in 2008-2009 has been documented. This is a direct result of restitution documentation, analysis and calculation in thousands of cases worked by Victim Services.

Changes, Challenges & Opportunities for FY 09-10

- The Victim Services Program is currently operating with four paid staff and twenty volunteers. It is a daily challenge to keep current with the large workload.
- The challenge is to continue to provide constitutionally and statutorily-mandated duties with declining financial support.
- The goal is to recruit and train five new volunteers in the fall of 2009. These volunteers will be able to provide services to crime victims and help with staff caseloads.

Performance Management

The number of services provided to crime victims is above target for this year. The staff and volunteers worked extra hard to provide comprehensive services to victims. The database used by the Victim Services Program allows staff and volunteers to document the services provided to victims. The use of this database started in the summer of 2005. The subsequent increase in number of services provided is due, in part, to the increased accuracy of the new database.

DIVISION PERFORMANCE MEASURES
